RE: Support for AB 340 – Expanding Access to Early Screening and Diagnosis

Dear Assemblymember Brown-May and Members of the Committee,

On behalf of Cure 4 The Kids Foundation (C4K), Nevada's premier nonprofit pediatric specialty care center, we write in strong support of AB 340, which will help ensure children in Nevada have access to early screening and diagnosis for neurodevelopmental and learning disorders. Early identification is critical to improving long-term health outcomes, providing timely interventions, and supporting families in accessing the care their children need.

We know firsthand that early identification and diagnosis are critical in improving outcomes for children. Many families face delays in care due to financial barriers or lack of coverage for necessary screenings. These delays can have lifelong consequences, impacting a child's development, education, and overall health. AB 340 addresses these gaps by requiring insurance coverage for screenings, assessments, and diagnoses, ensuring that children receive the care they need at the right time.

By removing financial obstacles and improving access to early diagnostic services, AB 340 will have a positive impact on children, families, and the healthcare system. Cure 4 The Kids Foundation remains committed to advocating for comprehensive pediatric healthcare policies that improve access and outcomes for Nevada's children. We appreciate the committee's leadership in advancing this important legislation and urge your support for AB 340.

Thank you for your time and consideration. Please do not hesitate to reach out if we can be a resource as this bill moves forward.

Sincerely,

Annette Logan-Parker
