

To; Senate Government Affairs Committee
Subject: AB197 with Amendment 176
Position: Support

Dear Senate Government Affairs Committee:

AB197 goes far in protecting citizens private information, information which may be held in government archives. This bill even allows a citizen who is harmed by government improper disclosures to seek court action to redress the injury. This bill protects the information about a citizen's donations to certain organizations. Such information is not to be treated as public information, and should remain confidential. Measures that protect citizen's private information are much needed in today's world. I support this bill.

Thank you,

Cynthia Perine
