

Hello, Chair and members of the committees. My name is Amber Falgout, I am the Communications Director with Battle Born Progress. We are in full support of AB55. It is a simple, tragic fact that for too many Nevadans, the cost of insulin is still far too high. These are people left with an impossible choice – their health or the cost of living – and left to ration their insulin and risk life-altering complications as a result. Those complications trigger a lifetime of pain and unending new costs, and all of it can be avoided if the people who need insulin can afford it, full stop. We thank Speaker Yeager for leading this effort, because passing a bill like AB555 would show Nevada can still be a leader in proving that healthcare is a right, not a privilege for the wealthy few.
